## INSTRUCTIONS

1. Cut out each photograph and/or collage image. If using a printed image, laminate the image to prevent ink from bleeding.
  2. Use a glue stick to adhere each image to the mosaic base. Seal the image to the surface with decoupage.
  3. Using Weldbond glue as adhesive, adhere Pink Sorbet Gold-Veined tiles as a border around each image or photograph.
  4. Adhere Clear Cathedral nibbles and bits on top of each image or photograph using Aleene's Glass and Bead glue.
- TIP: Apply glue to each individual tile prior to adhering, and press firmly once attached to distribute glue evenly underneath each tile. Use the wheel mosaic nipper, if needed, to cut tiles to a desired size.
5. Again using Weldbond glue as adhesive and the wheel mosaic nipper, adhere Mystic Crystal Glass tiles around the border of the plaque.
  6. Adhere a line of Sweetheart tiles along one edge of each photo or image.
  7. As you coat small areas at a time with adhesive, fill in the remaining areas of the mosaic base with Sky for Days tiles.
  8. Allow project to dry for 24-48 hours.
  9. According to the provided instructions, grout the surface of the mosaic with White grout. Use a slightly damp sponge to gently remove any excess grout, then clean the tile surfaces.
