CF230.72F Medium Blue Opalescent Frit - Fine
CF2702F Orange Opalescent Frit - Fine
GBS4-100 4 In. Square Clear Transparent
GBS10-200 10 In. Square White Opalescent
GO331 Black Outline
SP-8234 Glas Tac
ST540 Thinfire Paper

SUPPLIES

Angled Straw
Assorted Royal Aqualon Brushes
Black Permanent Marker
Clear Elmer's Glue
Detail Brush
Plastic Spoon

INSTRUCTIONS

1. Position a 4" Clear Transparent square in the center of a 10" White Opalescent square base. Secure in place with pinpoint of Elmer's Glue. Allow the glue to dry.

2. In the background area around the center square, use a black permanent marker to sketch a diagonal checkerboard pattern.

3. Use a plastic spoon to generously apply Peacock Green Opalescent Fine Frit along each intersecting line.

4. Within each diamond-shaped area, generously apply a border of Lemongrass Opalescent Medium Frit.

5. Fill in the center of each diamond shape with a Orange Opalescent Fine Frit.

6. Use an angled straw to overlay a thinner line of Medium Blue Opalescent Fine Frit along each Peacock Green line.

7. Use an angled straw to create an Ivory Opalescent Medium Frit border around each Orange Opalescent diamond.

8. Lightly sprinkle Ivory Opalescent Medium Frit in scattered areas of the project.

9. Use a paintbrush to brush off excess frit covering the center square.

10. Use small amounts of Glas Tac to secure frit in place.

11. Customize the project by using a detail or liner brush and Black Outline paint to paint a monogram design on the center square. When using Black Outline paint, ensure each brush stroke is thick and opaque when applied. If needed, apply an additional coat of paint once the initial coat has dried.

12. Allow project to dry, then contour fuse using the Spectrum segment 6 firing schedule.
