INSTRUCTIONS

1. Position the Flower Frenzy stencil onto the glass. Use an ultra-fine black Sharpie marker to trace the desired flower designs. Remove stencil.
2. Use a pallet knife to load 3 separate paint pots with small amounts of Deep Cranberry, Sapphire Blue, and Light Cerulean.
3. Mix in a small amount of Glass Medium into each paint pot until you achieve a heavy cream consistency. Start with a few drops of Glass Medium and add a little bit at a time as needed.
4. Use the combination of glass paint colors to fill in the traced design areas. Allow project to dry completely.
5. Overlay project with a layer of fine Clear Transparent Frit.
6. Contour fuse using the 6-segment firing schedule.
7. Once fired, slump project as desired.
